13. OSR Requirement for SA-5 Search

19 JAN

JJH met with [] this afternoon to discuss the OSR requirement for a search for SA-5's on each [] mission. IEG had several months back asked to be relieved of this requirement pointing out that they can normally accomplish the search during the first and second phase operations. [] showed JJH a map depicting the SA-5 sites in the Soviet Union plus the areas that they are still being asked to do searches on for SA-5's. [] was of the feeling that the requirements were outmoded and that they either needed to be revalidated or eliminated. As a result of the meeting, [] stated that he would call [] to tell him that he wanted our PI's to talk first hand with the OSR people concerning their requirement. [] is to get in touch with [] of OSR and arrange a meeting. [] is monitoring the EXSUBCOM end of the business.
